

IMPORTANCE OF REPLACING THE LEAD SERVICE TO YOUR HOME

Menasha Utilities has found lead levels in some homes above the EPA action level.

We are concerned about our customer's health and exposure to lead and feel it is important to address the lead services in our system. If too much lead enters your body from drinking water or other sources it can cause serious health concerns, especially for pregnant women and children under six years old or younger.

OWNERSHIP OF LEAD SERVICE

From the curb stop or shut off valve (in the terrace) to the main is owned by Menasha Utilities. From the curb stop or shut off valve to the home is owned by the homeowner. It is not the property line but the curb stop that divides ownership and responsibility.

FUNDS AVAILABLE TO REPLACE LEAD SERVICES

Menasha Utilities received approval to offer a financial assistance program to help its customers pay for a cost of this replacement. **The Utility will reimburse homeowners 2/3 of the cost to replace their portion of the lead service to the home up to \$2,000. The customer can pay the balance or is eligible for a loan to be repaid over 5 years at 0% interest. The loan amount would be capped at the main contractor price and would be included on your monthly Utility bill. If the property is sold the balance will be included with the sale.**

A requirement of the program is that one of the approved contractors listed **must** be used to perform the work. We will notify you as to which contractor is performing the main replacement that you can use, or you can contact one of the contractors directly to get a quote. An application for reimbursement is available on our website along with more information on the program at www.menashautilities.com.

Additionally, you can contact our Water Distribution Department to learn more about the program. Call between 8am and 3pm, ask for Dan at (920) 967-3431 or Scott at (920) 967-3430.
